ITCC
236 EE
17 October 2007

attendees:
Ken Ragsdell – EMSE
Karl Lutzen – IT
Christopher Dew – IT
Angie Hammons – IT
Eric Sigler – IT
Vicki Callaway – IT
Cheryl McKay – UA
Kevin W. Tharp – UA
Serhut Hosder – MAE
Todd Kreuger – IT
Michael Davis – Econ
Elliot Gross – StuCo
Stephen Gao – Geology and GE
Fatil Dogan – Mat'l Sci & Engr
Ronaldo Luna – CarE
Mike Nelson – Psych
Frank Liu – CS
Meg Brady – IT
Dan Cernusca – Distance Ed.
John Bax – IT
Thomas Vojta – Physics
Don Wunsch – ECE
?Oliver Sitton - CBE
Al Crosbie – MAE
Michael Carter – StuCo
Frank Blum – Chemistry
Matt Insall – Math/Stat
Lorie McMillin _ IT

1. Don passed out the agenda
2. Don called for a discussion of new MST web environment. Creating and updating webpages. Cheryl McKay, Meg Brady, Lori McMillin (?) and others discussed issues related to marketing and faculty/student "personal" content. Don discussed the value of allowing "personal" webpages, so that faculty can provide "nonstandard" information. Considerable discussion of the value of various approaches to web content control ensued. Mike Nelson (Psych) asked that the

process for creating and maintaining faculty webpages be made more simple. Don suggested that we continue this discussion at the December retreat.

3. Re-branding timeline. Vicki Callaway discussed timeline for re-branding (email and webpages). The transition will begin on 20 December 07. This transition will continue until summer 2008.

4. Vicki explained that the current plan calls for the wireless network to be changed on Tuesday, 27 November. Faculty sees that as a problem. The day after finals seems better.

5. Frank Blum's motion was considered. Motion made by Frank and seconded by Matt Insall. Motion passed unanimously.

****

Resolution in Favor of Computing Diversity

Whereas, faculty members have diverse ways of using computing to achieve productivity in teaching and research;

Whereas, different kinds of computing systems dominate different environments;

Whereas, knowledge of different operating environments enhances the campus' effort in education and research,

Now therefore;

Be it resolved, that the Information Technology and Computer Committee (ITCC) and the Academic Council (AC) of the University of Missouri-Rolla endorse the continued support by IT of multiple platforms and operating systems (e.g. Linux, UNIX, Macintosh, Windows) for faculty and student use.

****

6. Vicki indicated that the data center audit went well.
7. A request was made to discuss the issues related to risks associated with data center security breeches.
