Upgrades to base standards will be the fiscal responsibility of the department.

IT Green Initiative: Monitors and docking stations for Dell laptops will not be replaced with new DE machine orders. IT will replace one monitor and the docking station when the original fails at no cost.

A 3 year warranty is purchased for all machines. If a machine fails after the warranty expires, IT will move the machine into the current DE cycle and will be replaced.

Consultation will be available. The goal of this new service is to match technology with the business needs of individuals.
